COMMUNICATION

Strong communicator with a mentoring mindset. I help guide junior developers in code quality, architecture patterns, and clean practices across multiple teams and projects.

LEADERSHIP

Promoted from junior to tech lead on the Jawwy telecom project. Known for stabilizing high-pressure projects, enforcing zero-warning codebases, and delivering scalable architecture.

EDUCATION

ISEC – Instituto Superior de Engenharia de Coimbra
Bachelor's Degree in Computer Science Engineering
Sep 2015 – Mar 2019

EXPERIENCE

React & React Native Developer | Celfocus | Feb 2020 – Present

- Started as junior on Jawwy (mobile), became tech lead across 3 repos
- Built shared logic for mobile/web, maintained zero-warning codebase
- Helped with stabilization of Ooredoo project in 2023

Frontend Developer | Mobiweb | Sep 2018 – Feb 2020

- Developed apps for government and retail
- Projects: Junta+, GamingReplay, Marketplace dual apps
- Known for fast delivery and mentoring

SKILLS

- React.js & React Native - TypeScript & JavaScript
- Shared Logic Libraries - Custom Hooks & Context API
- Firebase & Node.js - Jest & React Testing Library
- Multi-Repository Architecture - Code Reviews & Mentorship
- REST API Integration - Agile Workflows

SUMMARY

Frontend Developer with strong code comprehension and architecture skills, currently working across three parallel repositories: a shared business logic library, a web portal, and a mobile application. Building a telecommunications management system with unified logic powering both web and mobile platforms.

Key competencies include:

- **React.js & TypeScript** for reusable component development
- **Cross-platform architecture** for shared logic across apps
- **State management** using custom hooks and context
- **Robust API integration** with centralized error handling
- **Testing** with Jest, React Testing Library, and Test Renderer
- **Efficient multi-repo workflows** for interconnected systems

Key Achievement: Delivered agile, scalable development across web and mobile channels simultaneously through logic decoupling and reusable component design.

Passionate about clean, readable code and continuous self-improvement.

EMPLOYMENT HISTORY

React & React Native Developer, Mobiweb

September 2018 — Present

Worked on multiple web and mobile projects across government and retail sectors. Contributed to full-stack development, reusable UI components, and shared logic across platforms. Collaborated in agile teams and often served as a go-to developer for high-pressure or time-sensitive initiatives.

Key Contributions:

- Acted as a mentor for junior developers, providing guidance on clean code practices, project architecture, and sustainable patterns across multiple teams.
- Frequently called on to support critical or "burning" projects due to fast turnaround capabilities and deep understanding of the codebase.
- Developed cross-platform logic and components used in both web and mobile apps.
- Contributed to or led major feature development in apps like *Junta+*, *GamingReplay*, and internal company tools.

Key Projects:

- **Junta+ Web App** – ReactJS frontend for local governance, with Firebase backend.
- **GamingReplay Mobile App** – Loyalty system with push notifications and user account management.
- **Dual Mobile Apps (Consumer & Provider)** – Firebase-based full-stack apps for marketplace functionality.

React & React Native Tech Lead, Celfocus

February 2020 — Present

Started as a junior developer on the **Jawwy** telecom project, focused solely on the mobile application. Over time, expanded responsibilities to include the shared business logic library and web portal, ultimately becoming a key contributor across all three codebases. Grew into a **tech lead role**, helping shape architecture decisions and mentoring teammates in frontend development standards.

Key Contributions:

- Progressed from mobile-only to managing and contributing across mobile, web, and shared logic repositories.
- Recognized for strong code comprehension and proactive learning, earning a leadership role within the frontend team.
- Passionate about quality and modern standards — proudly maintaining a **zero-warning codebase** (yes, really).
- Led by example in keeping the stack clean, up-to-date, and scalable through best practices, clean architecture, and testing.
- Actively mentor junior developers and contribute to code reviews, architecture planning, and performance improvements.

Notable Projects:

- **Jawwy Telecom Management Platform** – Built scalable and maintainable UI logic shared across web and mobile apps. Implemented centralized API clients, custom hooks, and reusable components.
- **Ooredoo Telecom (2023)** – Temporarily joined this high-priority project due to past performance. Brought in to stabilize the frontend and guide the team through architectural improvements. Delivered results quickly and was highly praised by the stakeholders.

Technologies: ReactJS, React Native, TypeScript, Jest, AEM
